PROFILE SUMMARY

B.Tech Information Technology graduate with hands-on knowledge of Python, Flask, SQL, HTML, CSS, JavaScript, Machine Learning, Git and GitHub. Developed projects including Fake News Detection using Machine Learning and a Student Result Management System. Interested in Python Developer, Backend Developer, Full Stack Developer, and AI/ML opportunities. Quick learner with good communication and problem-solving skills.

INTERNSHIP

CODESPARK TECHNOLOGIES (FULL STACK WEB DEVELOPMENT) | Feb 2026 – April 2026

Full Stack Web Developer with hands-on experience in end-to-end web application development. Proficient in frontend technologies (HTML, CSS, JavaScript) and backend development (PHP) with solid database management expertise. Completed full-stack internship at CodeSpark Technologies, building functional web applications and gaining practical experience in server-side logic and database integration. Strong foundation in web fundamentals and problem-solving. Currently strengthening React and TypeScript capabilities to build modern, responsive applications.

ICANIO TECHNOLOGIES (JAVA SPRINGBOOT) | July 2025 – August 2025

Java Developer with strong foundation in object-oriented programming and core Java concepts. Completed Java development internship at ICANIO Technologies, building expertise in Java fundamentals and software design principles. Experienced in writing clean, maintainable code following best practices. Seeking Java development opportunities to apply and expand technical skills in a professional environment.
